🔗 WooCommerce Documentation:
http://wcdocs.woothemes.com

1.0 WOOCOMMERCE SETTINGS
1.1 PLUGIN INSTALLATION

Main WooCommerce settings can be managed using native WooCommerce Tab in WP Dashboard. Yet some CuckooTap theme settings are managed using CuckooTap > WooCommerce Tab.

If you haven't installed WooCommerce plugin CuckooTap > WooCommerce Tab will not be displayed. Once you install and activate it, the tabs related to WooCommerce will appear and will be ready to use.

To install WooCommerce go Dashboard > Plugins and click Add New [1]. Enter WooCommerce [2] keyword in plugin search field. When search results appear, click Install Now [3]. When installation is complete activate the plugin.

1.2 STYLES AND SCRIPTS
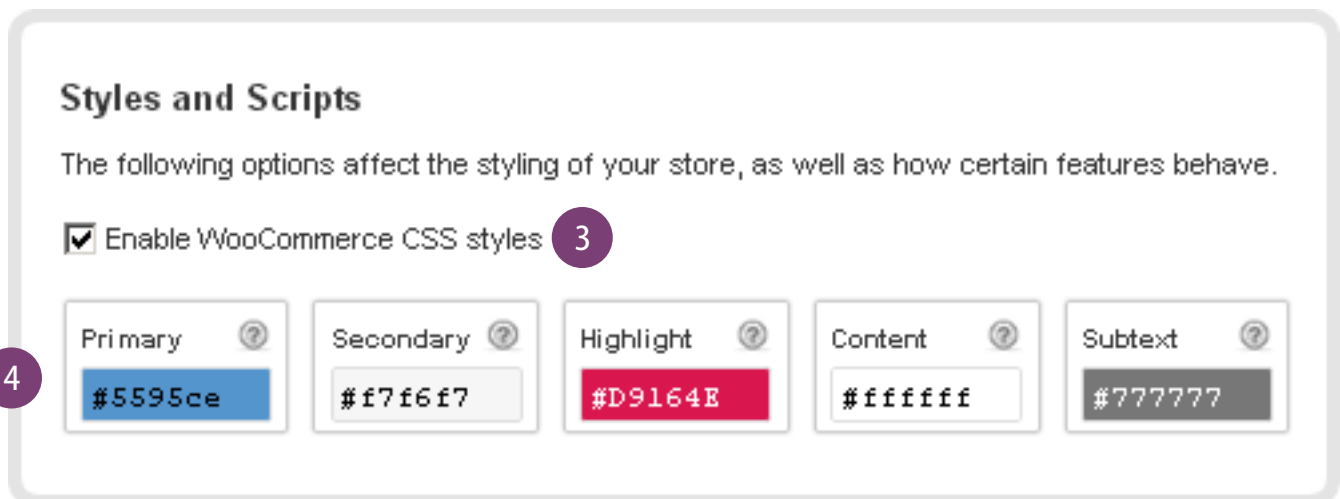

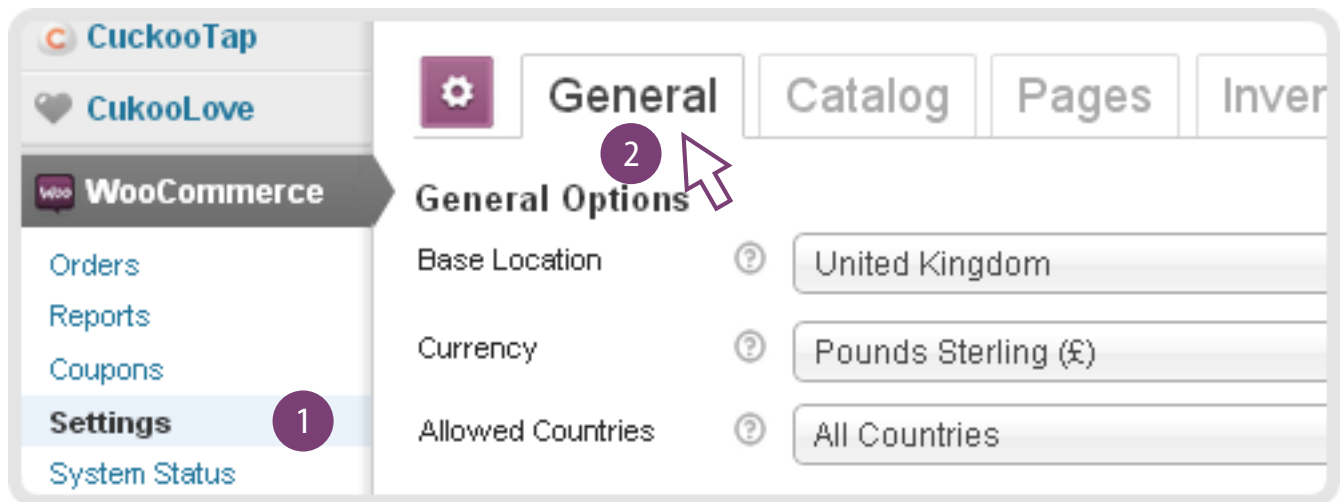

Before starting to use WooCommerce some important settings should be set. First you should set WooCommerce Styles and Scripts to fit CuckooTap theme color style. If you've chosen Light CuckooTap version, enter main colors of this version. The same applies to Dark version. If you've customized theme, enter your own color codes.

To setup WooCommerce Styles and Scripts go Dashboard > WooCommerce > Settings [1] and click General Tab [2]. Enable WooCommerce CSS styles [3] and Enter Your Color Codes [4] and Click Save.

Single Product Image	(4) Width	470	Height	400	Hard Crop ☑ ?
Product Thumbnails	(5) Width	140	Height	140	Hard Crop ☑ ?

⚠ Remember to setup WooCommerce Image options. You should set provided image sizes for Catalog Images, Single Product Images and Product Thumbnail Images.

It is essential to do this before starting to add your products images. If you set Image Options after you added product images, you may need to regenerate your thumbnails to fit theme layout.

To setup WooCommerce Image Options go Dashboard > WooCommerce > Settings [1] and click Catalog Tab [2]. Enter Catalog Images size 225x225 pix [3], Enter Width 470 pix for Single Product Image [4] and height as you need. Enter Product Thumbnails size 140x140 pix [5] and Click Save.

3.1 HOMEPAGE STRUCTURE

🔒 FIXED   ✛ FLOATING

CuckooTap Homepage Layout consists of fixed elements and floating elements. Fixed elements are arranged in fixed positions and cannot be rearranged, whereas floating elements can be arranged as you wish and added as many as you wish.

3.2 FIXED ELEMENTS

Fixed homepage elements are these: huge Slideshow Player at the top of the page with logo and main navigation units on it, Contacts Unit containing your contact details, contact form and Google map, and Footer at the bottom of the page. You can edit settings for all these elements using the framework.

3.3 FLOATING ELEMENTS

Floating elements can change their position in homepage layout according to your wishes and can be fully customizable. These floating elements are: Blog Posts Unit, HTML Text Unit, Page Unit, Social Media Unit, Team Unit, Testimonial Unit, Text Box Unit, Works Gallery Unit, Woo Navigation Bar Unit, WooCommerce Unit.

FOOTER 🔒

3.3.1 WOOCOMMERCE CATEGORIES UNIT

WooCommerce Unit allows you to display your featured products in homepage.
Add as many units as you need, choose different categories of products for each unit.

To Add WooCommerce Unit click Add Unit button and a new unit below all units will appear. Click Expand button, enter Unit Title [1], select WooCommerce [2] as unit source, choose Unit Content [3], enter Number of Categories to display [4], choose Sorting [5], Choose Display Order [6] and click Save button.

To change any floating unit position drag selected unit up or down by using Drag button.
If you want you can add a Custom Background Image or set Custom Color for this unit.
To delete unit click Delete button and then click Save button.

MENU URL EXAMPLE

Use Unit Slug in your URL.
Unit Title: Featured Products
Unit Slug: featured-produtcs
http://www.yourdomain.com/#featured-products

Editable Unit Slug will be generated automatically.
Use it to create URL to link to this unit. Remember to add # before slug.

3.3.2 WOOCOMMERCE PRODUCTS

Click Add Unit button and a new unit below all units will appear. Click Expand button, enter Unit Title [1], select WooCommerce [2] as unit source, choose Products as Unit Content [3], Choose Product Category [4], enter Number of Products to display [5], choose Sorting [6], Choose Display Order [7] and click Save button.
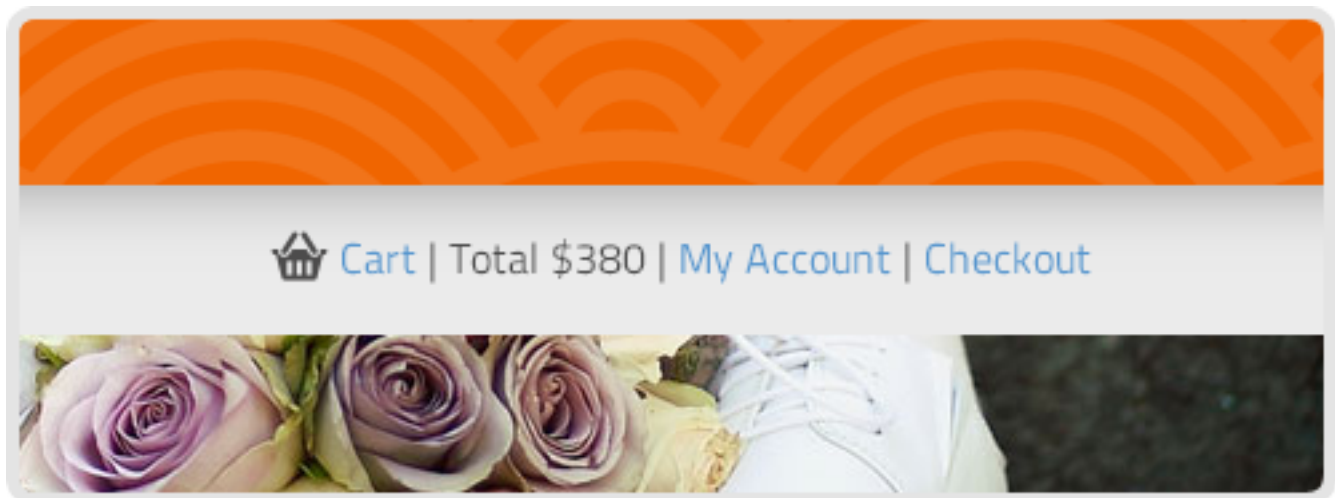

To change any floating unit position drag selected unit up or down by using Drag button.
If you want you can add a Custom Background Image or set Custom Color for this unit.
To delete unit click Delete button and then click Save button.

MENU URL EXAMPLE

Use Unit Slug in your URL.
Unit Title: Featured Products
Unit Slug: featured-produtcs
http://www.yourdomain.com
/#featured-products

⊗ Editable Unit Slug will be generated automatically.
Use it to create URL to link to this unit. Remember to add # before slug.

3.3.3 WOO NAVIGATION BAR UNIT

Woo Navigation Bar Unit allows you to display main Woo Commerce links and cart information in homepage and can be added using Homepage Builder. It can be linked from navigation menus as any other homepage unit.

Click Add Unit button and a new unit below all units will appear. Click Expand button, enter Unit Title [1], select Woo Navigation Bar [2] as unit source, set unit Font Size if needed [3] and click Save button.

To change any floating unit position drag selected unit up or down by using Drag button.
If you want you can add a Custom Background Image or set Custom Color for this unit.
To delete unit click Delete button and then click Save button.

4.0 SUPPORT POLICY

Go to our portfolio page at ThemeForest, click on your theme ant then click Comments Tab.
http://themeforest.net/item/cuckootap-responsive-single-page-wordpress-theme/discussion/3512405

Our theme support is not a requirement of ThemeForest marketplace and it is provided out of our good will. We make every effort to answer all your questions as soon as possible but we ask you to be patient and understanding.

We will be ready to help you on any issue regarding this theme from Monday through Friday within working hours (9 AM to 5 PM GMT). The questions are answered in order they are received. We do our best to provide feedback on any support queries within 48 hours.

CuckooThemes support is intended to be for our theme related bugs issues only.
Our Theme documentation file covers almost all available questions so that is why we do not offer support for installation, customization or administration of WordPress itself, we do not provide support for any third party plugins or problems caused by the usage of third party plugins as well.

For anything more than a bug fix, we suggest you to hire a developer.

All support is provided via ThemeForest Comments panel of the current theme. We do not provide any support via Twitter or Facebook.

We may ask you to email us your login information using contact form in our profile page on Themeforest if it is needed to solve your issue. In that case we'll contact you directly to protect your confidential information.
